Engineering the NEXT
in Payments, Banking & Fintech

Opus is a trusted engineering partner to payment providers, banks and fintechs navigating change in a real-time, digital-first world. We solve for business value—accelerating go-to-market, unlocking future readiness, and powering transformation at scale.

Our promise is simple: Business Value Acceleration. Realization. Maximization.

We deliver on this promise through the Opus trifecta—a domain-native engineering skillset, a value-creation mindset, and an AI augmented toolset that drives business agility. From MVP (Minimum Viable Product) to MPT (Maximum Possible Transformation), Opus turns engineering into business advantage.

Domain Native engineers (tech + domain + business)

Engineering What's NEXT with Our Comprehensive Suite of Services

Modernization
- Legacy Modernization
- Platform Modernization
- Cloud Adoption and Modernization
- Data Modernization

Data & AI
- Data Engineering
- AI and ML Services
- Opus AI

Cloud Engineering
- API-First Design and Management
- Application Refactoring
- Cloud-Native Application Development
- Cloud-Native DevSecOps

Quality Engineering (QE)
- Testing as a Service
- Certification Testing
- Smart Test Automation
- Performance & Chaos Testing
- Security Testing

DevOps
- DevSecOps Maturity Assessment
- DevSecOps Transformation Planning & Implementation
- Policy as Code & Compliance Automation
- DevSecOps Platform Engineering
- Infrastructure as Code (IaC)Enablement
- Site Reliability & Observability Engineering

Platform Build & Engineering
- Product Implementation
- Application Engineering
- APIfication
- Tokenization

The Opus Trifecta: Mindset, Skillset, and Toolset Aligned for Business Impact

SKILLSET
Domain Native Engineer

"We build and invest in a unique talent pool."

- 1,500+ years of deep, payments-focused experience.
- Industry-certified experts who blend business, tech, and compliance.
- Unmatched domain depth: Cards, RTP, merchant acquiring, regulations.

MINDSET
Value Creation

"We don't start with code. We start with context."

- We align every solution with your real-world business goals.
- Technology always starts with business context.
- Compliance, speed, and scale are wired in.

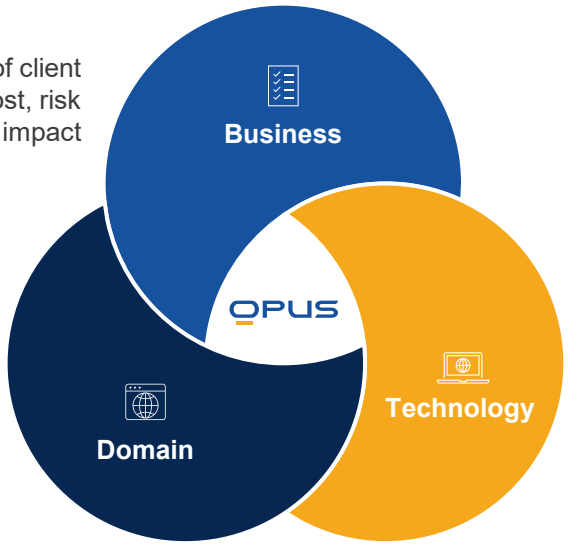

TOOLSET
AI Augmented

'We leverage AI to accelerate engineering and business processes."

We bring a curated set of:
- Domain-specific frameworks
- Pre-built integration templates
- Modular architectures
- Testing accelerators and automation kits

Domain Native Engineer [DNE]: Domain Insight. Expert Delivery. Disruptive Innovation.

Contextual awareness of client goals, user journeys, cost, risk and time-to-market impact

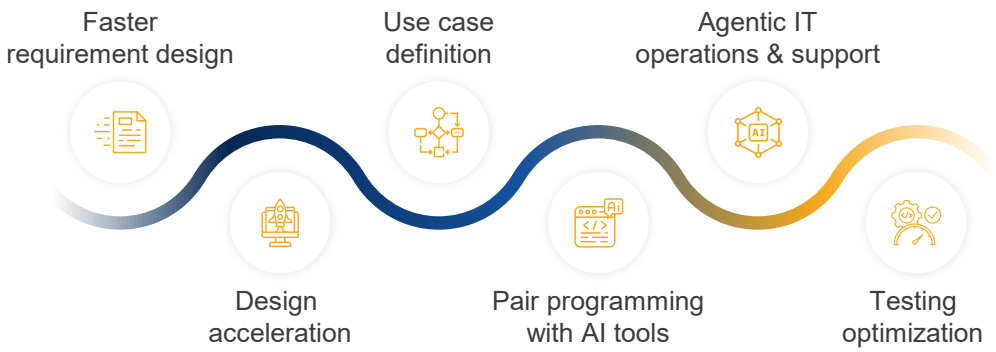

Deep understanding of financial services (e.g., ISO 20022, RTP, fraud, AML, interchange, card rails, compliance)

Expertise in building performant, scalable systems using modern cloud-native stacks, APIs, and data-driven architecture

Opus AI: Where Engineering meets Intelligence

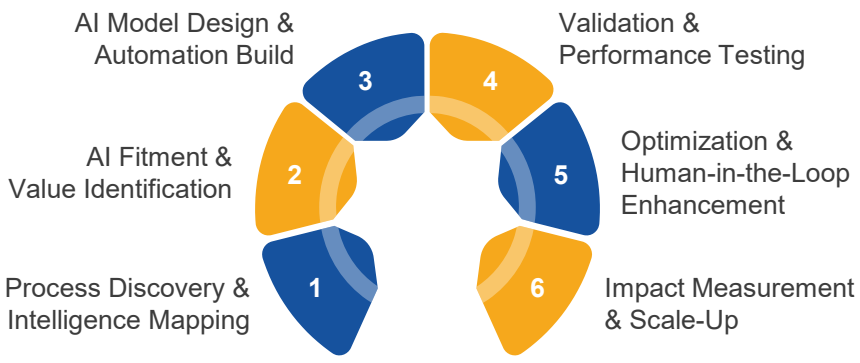

Opus AI is our portfolio of **context-driven, AI-powered solutions** designed to transform software engineering and business operations. It embeds intelligence into every layer - from how systems are built to how businesses operate - enabling clients to accelerate growth, scale efficiently, and innovate with confidence.

Integrating Productivity into software engineering and delivery with **AI-infused SDLC**

20% to 30% productivity commitment

Driving intelligence into process with **Our AI for Business Process**

2 to 4 weeks to reinvent and agent enable processes
